SUMMARY

Results-driven Data Scientist with 5.5 years of experience deploying AI/ML solutions and ETL pipeline in healthcare, and finance. Expertise in predictive analytics, ETL, MLOps, and cloud architectures. Delivered 35% ETL optimization, 40% latency reduction, and 12% revenue growth. Passionate about scaling AI for business impact and exploring AI frameworks.

EXPERIENCE

Infosys | Technology Analyst - Data Scientist 09-2025 - Present

- Design and deploy end-to-end **ML and ETL pipeline** solutions for banking, managing full lifecycle from data ingestion to data governance and production monitoring.
- Lead cloud data migrations to Snowflake and AWS S3 with zero data loss, and architect PySpark / Snowpark ETL pipelines achieving **35%** runtime reduction.
- Convert **ML models to ONNX** for in-database inference within Snowflake.
- Collaborate with cross-functional teams and implement validation frameworks to ensure scalable, reliable ML deployments.

Tata Consultancy Services (TCS) | System Engineer - Machine Learning Engineer 12-2022 - 08-2025

- Developed scalable healthcare analytics applications using **Python and PySpark**, processing multi-source patient data.
- Built ETL pipelines with advanced transformation techniques, improving processing speed by **50%** and reducing manual reconciliation by **70%**.
- Designed interactive Power BI dashboards for near real-time patient care analytics and operational KPI tracking.
- Implemented predictive ML models (classification, regression, and time-series) for patient outcome forecasting, attrition analysis, and healthcare demand planning, while managing end-to-end Databricks / AWS-based pipelines (S3, PostgreSQL).

Patona Digital Private Limited | Software Engineer 09-2022 - 11-2022

- Architected end-to-end ETL pipelines integrating property taxation data from multiple source databases into a centralized data warehouse.
- Extracted, cleaned, and transformed data ensuring high quality and consistency across all sources.
- **Automated 70%** of manual data transformation tasks through robust pipeline orchestration.
- Implemented data validation frameworks improving data accuracy and enabling data-driven tax policy decisions.

Thinkgestalt.Tech | Data Analyst 12-2020 - 08-2022

- Led the development of **BI reports**, dashboards, and data visualizations, providing insights for business process improvement and the **financial domain**.
- Supported **data modelling**, database design, and ETL processes, statistical analysis, data governance, **optimizing workflows** and ensuring alignment with business objectives.
- Engaged in **troubleshooting**, problem-solving, and the development of micro-services modules for reliable and efficient application delivery.
- Created REST APIs using Flask and Django, documented technical specifications, and developed impactful reports for **data-driven decision-making**.

SKILLS

- | | |
|---------------------------------|---|
| • Programming Languages: | Python, SQL, PySpark |
| • Database: | MySQL, PostgreSQL, Snowflake, AWS S3 |
| • Machine Learning | Regression, Classification, Clustering, Anomaly Detection, Survival Analysis, Scikit-learn |
| • Deep Learning | ANN, CNN, Transformers, Keras, TensorFlow |
| • Data Analysis: | Pandas, Numpy, Statistical Analysis, Data Wrangling, Data Cleaning, Data Transformation, Data Normalization |
| • Data Visualization: | Power BI, Matplotlib, Seaborn, Plotly |
| • Version Control: | GitHub, Bitbucket, Jira |
| • Soft Skill: | Good Explainer, Problem Solving, Analytical Thinking, Time Management, Cross-functional Teamwork, Stakeholder Communication |

PROJECTS

Enterprise Data Migration and In-Database ML Deployment | Infosys

- Migrate **10+ TB** enterprise data from different sources to **Snowflake** with zero data loss, ETL consistency, and **ML inference** capabilities.
- Consolidated data from sources into **Amazon S3**, migrated **PySpark ETL to Snowpark**, converted machine learning models to **ONNX** for in-database inference, and implemented validation frameworks.
- Achieved **35%** ETL runtime reduction, 100% data integrity post-migration, and 100% prediction reliability.
- Leveraged Python, PySpark, Snowpark, Snowflake, AWS S3, ONNX, SQL, Git, and Jira to build and deploy the solution.

Health and Wellness DIP Framework | Tata Consultancy Services (TCS)

- The **Health and Wellness medical domain**, where the primary challenge was managing and integrating vast amounts of patient and wellness data from multiple sources.
- Developed **scalable applications** using Python and PySpark, applying data transformation techniques to ensure data quality and consistency.
- **Optimized ETL processes** for speed and accuracy, improving decision-making and patient care analysis.
- Leveraged **Python, PySpark, Power BI, PostgreSQL**, and **AWS S3** to derive insights and enhance healthcare service delivery.

Automated Trading System | Thinkgestalt.Tech

- **Automated Trading System** integrating real-time data with complex algorithms for accurate decision-making.
- Developed **Python modules** using functional and OOPs concepts with Plotly for visualization and Task Scheduler for automation.
- Deployed **micro-services-based REST APIs** using Flask, ensuring efficient data handling and seamless communication between MySQL and MongoDB.
- Utilized **Python, Flask, REST API, MySQL, Power BI, Task Scheduler**, and **Micro-services** for developing and deploying a scalable trading bot.

Lead Generation for Sales | Thinkgestalt.Tech

- Enhanced **lead generation** by efficiently gathering and managing B2B and B2C client data.
- Developed a **web scraping solution** with Python, BeautifulSoup, and Selenium to automate data collection from online sources.
- **Increased revenue by 12%** through optimized lead generation and improved client outreach.
- Utilized **Python, BeautifulSoup, Selenium**, and **MS Excel** for data scraping, organization, and analysis.

Aqua Drone to Collect Floating Waste | Thakur College of Engineering and Technology

- Developed an **Aqua Drone** for automated floating waste collection, integrating AI for accurate detection and monitoring.
- Created a **YOLO-based AI module** with mobile app integration, improving waste detection accuracy by **5%**.
- Enhanced **environmental clean-up** through a scalable, automated waste management solution.
- Utilized **Python, Flask, REST API, YOLO**, and **Raspberry Pi** for integration of AI and drone operations.

EDUCATION

Thakur College of Engineering and Technology | Master of Engineering (M.E.)

Mumbai | 07-2019 - 07-2021

- **Master's in:** Information Technology – (Data Science)

CGPA : **9.78**

- **Relevant Work:** Python, Flask, Django, Rest API, Machine Learning, Deep Learning.

PUBLICATION

- Patented Certificate by the Government of India for AN AUTONOMOUS TRASH COLLECTING BOAT (AQUA-DRONE) SYSTEM | [Patent No.: 568217](#)
- Design of an Aqua Drone for Automated Trash Collection from Swimming Pools Using a Deep Learning Framework (**Springer Publication**) | [DOI:10.1007/978-981-19-9225-4_41](#)
- Design & Implementation of Car for Smart Cities - Intelligent Car Prototype (**Springer Publication - Paper Code - 261**) | [DOI:10.1007/978-981-13-3393-4_50](#) | [Corpus ID: 86439097](#)
